

Evolve 365 Adoption Report

Evolve 365 Adoption Report Sample

Why do adoption reports matter?

Deployment is not equal to adoption! It is no longer a game of just picking the best tool for the job at hand, but it is about understanding the people doing the job, the environment the job is done in and how those doing it engage with each other. Adoption reports allow us the ability to track our success and impact to our users.

How we build our reports:

- Users use their Office 365 accounts to access Evolve 365 and we record what training they complete within Evolve 365.
- We integrate Evolve 365 with the Office 365 Usage Reports so that we are able to read the reports inside of the Evolve Admin Center.
- We review the Office 365 usage and determine how much is being done by users who are getting training from Evolve vs users who aren't using Evolve.
- We show a correlation between the training we provide in Evolve and usage of Office 365.

All workloads show a trend that the users who have been training on Evolve 365 are consuming more of Office 365 than those that have not consumed training. If we are able to increase those that are exposed to the Evolve training, we will be able to increase the overall usage of Office 365.

OneDrive Consumption

OneDrive

■ Avg. for Registered Users ■ Avg. for Not Registered Users

In the last 6 months on average, non trained users have completed a sync task 231 times and trained users have completed a sync task 2,022 times.

That is an increase of 1,791 sync activities by trained users!

Skype For Business

Teams

How it works!

Use learning campaigns to drive training, training ultimately increases technology use and adoption.

OneDrive for Business

Syncing and Sharing

OneDrive for Business offers us a centralized and secure place to store, share, and collaborate on our work files. Sharing files from OneDrive allows us to collaborate with others and never worry about document versions or lost data. You may also sync files to your desktop to work on them offline. Learn more about syncing and sharing in OneDrive for Business with Evolve 365.

[Create a Sharing Folder >](#)

[Syncing your files](#)

[Sharing documents](#)

[Co-Authoring documents](#)

By syncing your OneDrive for Business files, you can work on them from your desktop or even offline. If you are working on documents offline, they will be available when you share them from your OneDrive for Business account.

Share your documents from OneDrive for Business to enable others to work on them with you. When you share them from your OneDrive for Business account, others can work on them at the same time.

Work with others at the same time in Word, Excel and other Office files. Simply share a link to the document with those you need to collaborate with and get started.
