

FEATURES	ENTERPRISE	GCC	GCC-H	DOD
SharePoint: Page Sharing Simplifying page sharing, making sharing a page just as easy as it is to share a document. Users can now share SharePoint pages and news posts individually without having to share the entire site, just like other Microsoft 365 files. All sharing settings at the site and tenant level will be respected. Feature ID: 124822 EST ROLLOUT JUL 2023	✓	✓	✓	✓
SharePoint: Advanced Editing in Image Web Part The new image editor provides advanced editing capabilities such as shape cropping, color adjusting, adding filters and overlaying text. Feature ID: 124825 EST ROLLOUT JUL 2023	✓	✓	✓	✓
Microsoft Stream: New Webpart The updated Stream web part will ensure you can stream all types of video inside your pages by supporting single and multiple videos with folders and playlists. Feature ID: 124800 EST PREVIEW JUN 2023 EST ROLLOUT JUL 2023	✓	?	?	?
SharePoint: Content Pane for SharePoint Pages and News SharePoint shines when multiple documents, videos, and images are featured together on one canvas, so we're adding a new content pane and content suggestions that make it easier and faster than ever to build pages that feature lots of content. The content pane allows you to quickly browse and add content from across your SharePoint sites with content suggestions to automatically recommend relevant content based on what you're working on. Feature ID: 124827 EST ROLLOUT OCT 2023	✓	?	?	?
SharePoint: Centralize Organization Brand Management The new Brand Center in SharePoint empowers you to specify fonts, colors, logos, and other design elements that reflect the identity of your organization, products, subsidiaries, and more. You can reuse these branding elements across sites, and SharePoint will provide the right guardrails so you can be confident that site owners are aligning with your branding guidelines. Feature ID: 124838 EST ROLLOUT DEC 2023	✓	✓	✓	✓
SharePoint: Co-authoring on SharePoint Pages and News SharePoint's new page coauthoring capabilities make it easy for editors to come together into the same page canvas and craft their content in real time. Feature ID: 124853 EST ROLLOUT MAR 2024	✓	?	?	?
SharePoint: News in Outlook With the new integration of SharePoint pages into email, you can preview and send full news posts as emails to your readers' inboxes. To help you get started, we're also adding six templates designed to look great in email and the web. And, with our unified page analytics, you'll be able to see your total page reads across Outlook and SharePoint together. Feature ID: 124803 EST ROLLOUT JUL 2023	✓	?	?	?
SharePoint: New SharePoint Start We're introducing a new start experience for SharePoint that's filled with inspiration about what you can create. Newsletters, event announcements, project tracking sites, trip reports, brochure sites - this updated SharePoint start page features templates that connect the intranet directly to your most common team and organizational communication needs. With this new experience, getting started with creating sites and pages is easier than ever. For instance, if you want to create a video page that hosts your recent town hall recording, you can create one instantly. All these personal pages are managed directly from the new start experience, so there is less overhead to getting started with SharePoint. Feature ID: 124824 EST ROLLOUT SEP 2023	✓	✓	✓	✓
SharePoint: Copilot in SharePoint Combining the power of Large Language Models (LLMs), your data in the Microsoft Graph, and our best practices for creating engaging web content, Copilot in SharePoint turns your words into SharePoint sites and pages. If you can describe the site or page, Copilot in SharePoint will begin to create it for you, and then work with you to edit and refine it. And all within our existing commitments to data security and privacy in the enterprise. Feature ID: 124840 EST ROLLOUT NOV 2023	✓	?	?	?
SharePoint: Video Pages The new video-focused page templates help you publish professional content whether you start from SharePoint or Microsoft Stream. If you need to create a piece of content where the video is the hero element, like highlighting the recording and content from a town hall meeting, you can use the new video page templates. You can create video pages not only from SharePoint but also from Microsoft Stream, making it easy to start right from the video itself. Feature ID: 124823 EST ROLLOUT SEP 2023	✓	✓	✓	✓
SharePoint Pages: Design Ideas Copilot also helps page authors turn their existing content into stunning SharePoint pages. As your web design partner, Copilot takes your existing document or presentation and turns it into a page that leverages web design visuals. It can help you rewrite key passages of text on the page too, helping you strike just the right tone that will drive engagement with your readers. Feature ID: 124846 EST ROLLOUT JAN 2024	✓	?	?	?
SharePoint: Microsoft Lists- A New Forms Experience to Collect Information We are making it easier to collect information with an updated forms experience for Microsoft Lists. Forms look clean, are easy to design, can be easily shared, and respondents are able to fill them out on any device. All form responses appear immediately in your list after recipient clicks the submit button. Feature ID: 124865 EST ROLLOUT OCT 2023	✓	?	?	?
Microsoft Stream: Playlists in the SharePoint List Webpart With playlists in Microsoft 365, you add content using the new 'Playlist' template in Microsoft Lists. Once you have the right collection of audio or video files, it's instantly ready to playback and share. This feature will allow you to display playlists on SharePoint pages using the List webpart. The playlist will display video titles and thumbnails, and people with access to files in the playlist can click on the thumbnails to view the videos. Feature ID: 124808 EST ROLLOUT JUN 2023	✓	?	?	?
SharePoint: Microsoft Lists - User experience (UX) update This update improves overall performance of Microsoft Lists and introduces new features, like the ability to add ratings to any list, drag and/or paste images directly into a list, see who collaborating with you - and where - in real-time, switch views by clicking tabs, and more. Feature ID: 124867 EST ROLLOUT JUN 2023	✓	✓	✓	✓
Microsoft Stream: View video analytics in playback experience for Government Clouds This feature will allow users to view analytics for videos stored in OneDrive or SharePoint for which they have view permissions. The analytics are shown as an overlay during video playback and can be toggled on or off by selecting the 'Analytics' side pane. Users will be able to see stats showing the number of views and viewers for the last 90 days along with viewership retention which indicate the parts of the video that are most and least viewed. Feature ID: 124873 EST ROLLOUT MAY 2023	✗	✓	✓	✓
SharePoint: Change history in SharePoint Admin Center You can create change history reports in the SharePoint admin center to review SharePoint site property changes made within the last 180 days. Create up to five reports for a given date range and filter by sites and users. You can download the report as a .csv file to view the site property changes. Feature ID: 124872 EST ROLLOUT MAY 2023	✓	?	?	?
Microsoft SharePoint: Resource Specific Consent Resource-specific consent in SharePoint refers to the ability to grant or restrict access to specific resources within SharePoint, such as a document or a list, based on individual user permissions. This means that users are given permissions only to the resources they need to access, and not the entire SharePoint site. Resource-specific consent helps ensure the security and privacy of sensitive information by limiting access to only those who require it. Feature ID: 124842 EST ROLLOUT DEC 2023	✓	✓	✓	✓
SharePoint: Application Site Creation without Sites.FullControl.All Application Site Creation without Sites.FullControl.All refers to the ability to create a new SharePoint site without having full control over all the sites within the organization. In other words, it is a way to give users the ability to create new SharePoint sites but with limited permissions. This feature allows organizations to delegate site creation tasks to certain users or groups without giving them complete control over all the sites within the organization. This helps to maintain the security and integrity of the SharePoint environment by limiting access to only those who need it. Feature ID: 124843 EST ROLLOUT DEC 2023	✓	✓	✓	✓
OneDrive: Access Lists, Forms, Sway & PowerBI content in OneDrive Web We're adding the capability to surface Lists, Forms, Sway and PowerBI content in the OneDrive Home, Shared and Favorites experiences within OneDrive Web. Feature ID: 124870 EST ROLLOUT JUL 2023	✓	✓	✓	✓
OneDrive: Sharing experience - Manage Access settings We're optimizing the unified file sharing experience OneDrive delivers across Microsoft 365. We've rebuilt the sharing dialog so it's less cluttered and simpler to use. We've also improved the "copy link" experience, so you get a clear on-screen confirmation that the link has been copied, and the confirmation self-dismisses, saving you a click. Feature ID: 83726 EST ROLLOUT JUN 2023	✓	✓	✓	✓
